#### Color Scheme

The gradient that is used in the logo is a combination of blue and green colour. The colours connote attributes like blue standing for trust & royalty and green signifying sustainability and prosperity.

#### **Elements Illustration**

#### Alphabet "A":

The letter 'A' is associated with a sense of affirmation alongside a symbolic belief that it is compared to the universe itself. Being the first letter of the set of alphabets, it represents a rising above the rest and the beginning of all things too. The graphical representation of "A" gives it a sense of stability reinforcing strength & equilibrium. It epitomizes excellence and one's conviction towards being an achiever. It is visually synonymous with nouns like apex, growth, and progress.

Nonetheless, "A" stands for Auro!

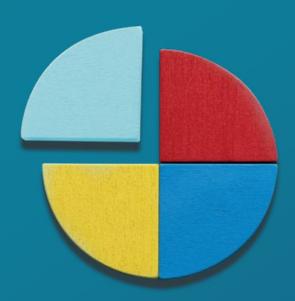

#### Circle:

The Circle represents unity, infinity, wholeness, the universe, balance, stability, and perfection, among others. It depicts an ecosystem with an equilibrium.

## Brand Colors

There should be uniformity in the colour representation of the logo when produced on different media collaterals. The diverse media classified into print, web, and offline applications are segregated utilizing colour codes that are mentioned hereby and need to be followed without any exemption. In cases where specific swatches are required for desired applications, please refer to the beside section.

# Sizing & Spacing

As an important factor to keep the corporate marks clear of any other graphic elements, an exclusion zone has been established around the corporate mark to regulate. This exclusion zone indicates the closest any other graphic element or message can be positioned concerning the mark of the symbol itself and as the company name - they have a fixed relationship that should never be changed in any way.

#### Clear Space Area & Size Consistency

Clear space area is designed as the empty space around the logo that needs to be kept around the logo in order to give it a clear demarcation with respect to other elements surrounding it. The exclusion area can be determined by the following steps. Measure the height of the first letter 'A' of the brand logo.

#### 1:6 Ratio

#### Logo Grid

The logo grid is created to avoid ambiguities in terms of proportions with respect to the elements of the logo. For hand painting and other usage, this grid needs to be followed strictly so as to maintain the proportions and visual aesthetics of the symbol and the logotype.

### Typography

There are two fonts used in communications - one that belongs to the logotype family (to be used as headlines, descriptors and headers) and the other to be used for body text.

#### Primary Typeface

We use "adobe hebrew" family font for headlines, standard sized text and introductory copy. It should appear as uppercase for headlines and sentence case in the majority of situations.

### Visual Language

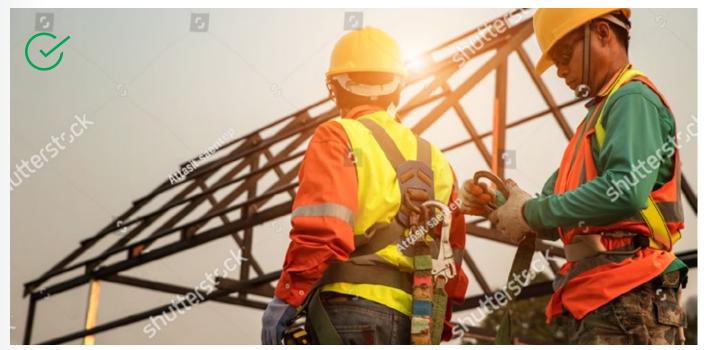

Photographs used for the brand communication should not contain competitor logo/product or inappropriate context. The minimum permissible image resolution for print media and digital media is 300 dpi and 72 dpi respectively.

If there is a need to use stock photographs, please source photographs only from the recommended stock photo sites.

All purchased stock photographs (royalty free or rights managed) that meet the minimum resolution quality should be used for any creative that is intended for commercial use (e.g., product brochure, EDM, etc.) Try to use well composed, energetic images. Avoid camera facing potrait images.

Avoid poorly composed & cluttered images.
